

# HOW SECURE IS YOUR EMAIL PASSWORD?

Is your new password similar to one of your previous passwords?

How long is your password?  
Is it atleast 10 characters long?

Does your password contain guessable words or characters such as qwerty, your name, your pet's name, date of birth, etc?

How many people know any of your present or previous passwords? Are you re-using any of the passwords being disclosed in a data leak?

How complex or simple is your password?

Do you write down your passwords anywhere?

Switch to a passphrase which is easily memorable to you, whereas hard to guess.

Never share passwords with anyone.

Keep passwords unique and never reuse them.
